No. 90 $\frac{1}{2}$ , " Hickory, Flat, with T Head,	8 " 9 to 16 " 36 " " "	12 00

### Log Measures.

Explanation of Log Sticks:—These Sticks give the number of feet of one inch square edge boards sawed from a log from 12 to 36 inches in diameter. The figures 12 to 20, near the head, are for the length of logs in feet; follow the column under the length of the log to the diameter of the log, which will give the number of feet the log will make. Logs not over 15 feet long, the diameter should be taken at the small end; over 15 feet in length, at the middle.

The adjusting of the Fence to this Plow will be found a great improvement over the old style of Plow. It is simple in its construction, easily and accurately adjusted; as all projections are on the left hand side, the mechanic is not obliged to remove his tools from the work-bench in order to use it.

This attachment is applicable to all Screw Arm Tools.
